

# Student Mentorship Program, IIT Delhi

Dear Student,

Congratulations on making it to IIT Delhi, and beginning a new phase of your life, a phase that is sure to shape your ideals, your beliefs, your thinking and give you a path for the future. It is a time in your life where you begin to understand the freedom of thought and of action. You start a process of exploration and discovery - of things around you, of your own self, your strengths and interests. You embark on a journey, a process that will teach you to find ways to have a meaningful life and recognize your responsibilities, discharge them well and know, appreciate and exercise your rights.

IIT Delhi will strive to support you in this journey that you are about to undertake. The journey is important, not because you'll get somewhere, but because of the experiences you will gain on the way. And obstacles will be many, even your own inhibitions might begin to trouble you. This is where we believe some experienced people from the senior years can perform the role of guides and mentors.

The Mentorship Committee (MRC), steering body of the Student Mentorship Program (<http://www.smp.iitd.ac.in>) has a primary mandate of helping the freshers feel empowered. Through our measures, we try to ensure that your experiences in IIT are free from unnecessary pressures and undue influences and you are able to make informed choices.

For this purpose, the MRC carefully selects mentors from amongst senior students at IIT Delhi - someone that you can approach with queries on any issue like academics, extracurricular, personal life or the issue of maintaining a balance between them. They will be your friends, philosophers and guides through your journey in IIT Delhi.

To facilitate the interaction between you and your mentor and to help establish the first contact, please fill in your personal details on the following link: <http://iitd.info/freshers14>

You can also contact the MRC whenever you face any problem that makes you feel wronged. We will keep in touch with you all through the year, interacting and learning from you about your experiences of the system and share your thoughts and ideas for the betterment of our community.

So here's wishing you good luck for your stay in IIT Delhi.

Prof Manju Mohan  
President  
Board for Student Welfare, IIT Delhi

PS: Please find below the contact details of the student members of the Mentorship Committee. Feel free to contact them anytime for any doubts that you may have.
